To Whom It May Concern:

Denise A Thurmond is under my care for general anxiety disorder. She was initially managed on as-needed Clonazepam and Trileptal. She stopped the Clonazepam in April 2019. She started a new job and reported being harrassed. She was subsequently dismissed from the position. After the dismissal her anxiety increased substantially (GAD7 increase from 9 to 15). This is requiring her to take additional antidepressants and anxiolytics to help with there mood and anxiety.

If you have any questions or concerns, please don't hesitate to call.
